

FLOCKING FOR OBJECTS

Automatic Flaming Cabinet mod. CF/R

The **Flaming Cabinet mod. CF/R** consists of:

- Closed cabin for safety protection
- Gas burner for flame treatment equipped with a spark plug, detection probe and security of flame
- Robot
- Internal light (2 x 18W)
- Control cabinet

With this cabinet, it is possible to flame a variety of objects of different shapes. The process is completely automatic and it is done by robot. The objects are fixed in place on a rotating table: the operator places the object, then the table rotates to the flaming position; the other side is ready for the loading/ unloading operations and the opposite side is ready for the automatic flaming process.
