FLOCKING FOR OBJECTS

Automatic Glue Spraying Cabinet - mod. CV/R

The **Glue Spraying Cabinet mod. CV/R** consists of:

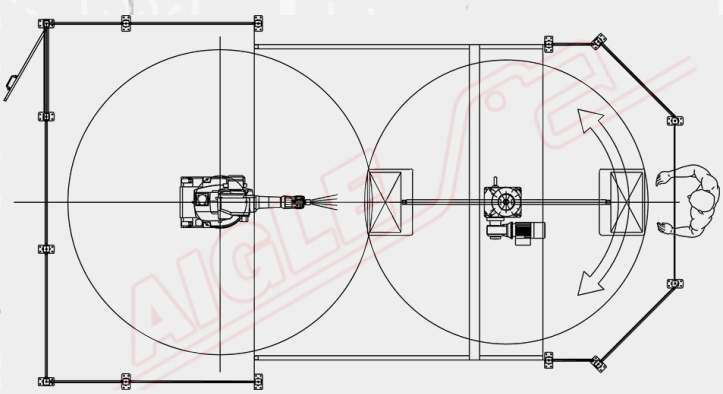

- Closed cabin for environment protection
- Double dry filtration system and Paint-Stop cover for quick replacement
- Internal light (2 x 18W)
- Suction fan

With this cabinet it is possible to spray a variety of objects of different shapes. The process is completely automatic and it is carried out by a robot.

The objects are supported by a rotating table: the operator places the object on the table, then the table rotates to the spraying position; one position is ready for loading/ unloading operations, on the opposite side another piece is ready for the automatic painting process.

The glue pump/ drum group is positioned in the rear of the cabin.

The cabin is properly depressurized by a fan equipped with filters, in order to avoid any over-spray is released into the environment.

TECHNICAL DATA	
Useful width	to be defined
Power supply	400 V/50 Hz/three-phase
Installed power	3 kW

Member of CISQ Federation
CERTIFIED MANAGEMENT SYSTEM
ISO 9001 - ISO 14001
