

FLOCKING FOR OBJECTS

Electropneumatic Flock Distribution Group - mod. ESP1

The **Electro-pneumatic Flock Distribution Group mod. ESP1** is specifically designed to flock internal areas.

The machine consists of two separate elements:

- **Containing/dosing group**
- **Spraying group**

The containing/dosing group is a special flock container on wheels. A brush equipped with a speed control is mounted at its base. Flock feeding from the brush to the flock/air mixer is constant and adjustable.

The flock and air flows can be independently adjusted through the PLC.

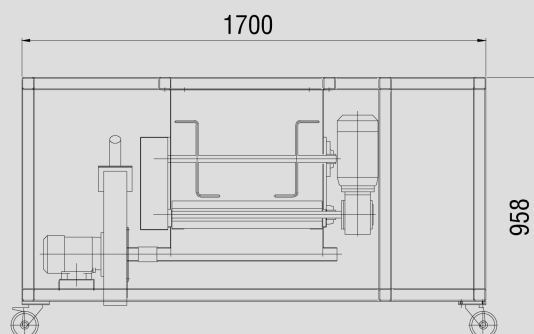

The spraying group consists of a special gun attached to a flexible tube.

The unit is connected to an **Electrostatic Generator mod. GE/101/NEA** (0÷50,000 Volt variable tension).

TECHNICAL DATA

Power supply	400 V/50 Hz/three-phase
Installed power	1 kW
Compressed air	7±1 Kg/cm ²
